DETAILED ACTION

Claim 12 has been cancelled. The active claims are 1-11 and 13-19.

In view of the amendment, the Section 101 Rejection is withdrawn. The submitted drawings are accepted.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10-11, 14, 15 and 18-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear whether they are dependent claims or independent claims. If they are independent claims, the steps should be positively recited in the claims. If they are dependent claims, they are improperly dependent on method claims because they are apparatus claims.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim2 1-11 and 13-19 rejected under 35 U.S.C. 102(b) as being anticipated by Richter (USP 5,623,490).

See at least Figure 7 and the description thereof in the specification. Richter teaches:

Claims 1, 2, 3, 4

A data packet processing device (Figure 4, 7A and 7B) for processing data packets received from a network, including: a processor (inherent in the caller machine) for processing data packets;

an interface (any elements shown in Figures 7A and 7B which involve in transferring received packets to and from Read Queue 722) operable for transmitting data packets to and from an external memory (Read Queue 722);

a scheduler (see 708, 710 and 712 in Figure 7A) for assigning priority information to received data packets, the priority information determining an order of data packets to be processed;

an internal memory (716 and/or 722) for storing data packets;

a memory manager (726) operable to cause storing data packets in the external memory and to provide data packets in the internal memory for being processed by the processor; wherein the memory manger provides data packets in the internal memory for being processed by the processor subject to the priority information assigned to the data packets.

Claim 5

The "wherein clause" merely consists non-functional descriptive material.

Claims 6-19

Claims 6-11 and 13-19 have similar limitations as claims 1-5 and therefore are rejected for the same reasons.

Response

Applicant's arguments with respect to claims 1-11 and 13-19 have been considered but are moot in view of the new ground(s) of rejection.
